

Add self-service kiosks to your restaurant

without adding yet another
software to your stack

With **LS Central for restaurants** as your restaurant management system, you can

- ✓ Run self-ordering kiosks with the **same software** you use in the restaurant
- ✓ Send orders from the kiosks **straight to the kitchen** printers or KDS
- ✓ Control offers, menus, and prices **centrally** for the POS and kiosks
- ✓ Track **sales and inventory** for all your sales (online, at POS, at kiosks)
- ✓ **Customize** the kiosk display to your brand
- ✓ Showcase **breakfast, lunch, or dinner menu**, depending on time of day
- ✓ **Free up your staff** from taking orders and focus on customer care
- ✓ Accept orders in **multiple languages**

LS Central for restaurants

The all-in-one software that gives restaurants, cafés, pubs, and other food service businesses a big-picture viewpoint and real-time data.

Built on ERP Microsoft Dynamics 365 Business Central.

Unify your business front to back

Control all your business processes, including purchasing, customers, revenue, waste, franchises, kitchen, front of house, and financials, in **one platform**.

Eliminate errors and waste

Work more efficiently and reduce manual work. Use real-time, reliable data to **decrease waste, order just what you need**, and price your dishes correctly.

Manage your locations centrally

Manage all your restaurants, including **franchises**, and your **eCommerce** centrally, using just one solution with deep industry functionality.

Let guests order as they want

- ✓ Traditional **point of sale terminals** at the counter.
- ✓ **Mobile** devices, to take orders at the table, outdoors, or at the curbside.
- ✓ **Self-ordering tablets** at the table.
- ✓ **Self-ordering kiosks**.
